In agreeing to an electronic subscription to Forensic Science International, Forensic Science International: Genetics, Legal Medicine, and Science and Justice, I understand:  
• Access would be electronic only • Access would be to full-text content, from 1995 onwards (for the Forensics Package) or 2007 onwards (for Digital Evidence Package), plus Articles-in-Press • These member subscriptions are not to replace existing institutional subscriptions that might be available for some members through their places of work. A member subscription is intended for the use of the individual member only. If Elsevier becomes aware that a member subscription is being used as an institutional subscription, then Elsevier must necessarily take action. • Electronic access is provided by The ScienceDirect® Society Service  
The system: a) holds a list of Activation Codes that can be activated by members. b) Activation Codes would correspond to the membership codes of those members of the American Academy of Forensic Sciences who wish to subscribe, as provided to Elsevier by the Academy. c) Members activate their account using their Activation Code; the member chooses a password and receives a username for accessing the site in the future.
